Handbook

What makes a good Hackathon?

Build, test and improve – fast

Challenges:

- Share your story
- Make resources (raw data, APIs, documentation,...) technically and legally available. "Open" is the strongest way - if this is not possible, there are alternatives (we can support you)
- Try to develop as concrete a prototype as possible by turning your conceptual idea into an application

This place is

SAFE

We are all in this, together.

Check out the Hack Code of Conduct
